a Task tiers and evaluation focus

50 source tasks

Easy — 20 (40%)

Elementary steps and conformational change

Normal — 10 (20%)

Multi-step networks and evidence continuity

Hard — 10 (20%)

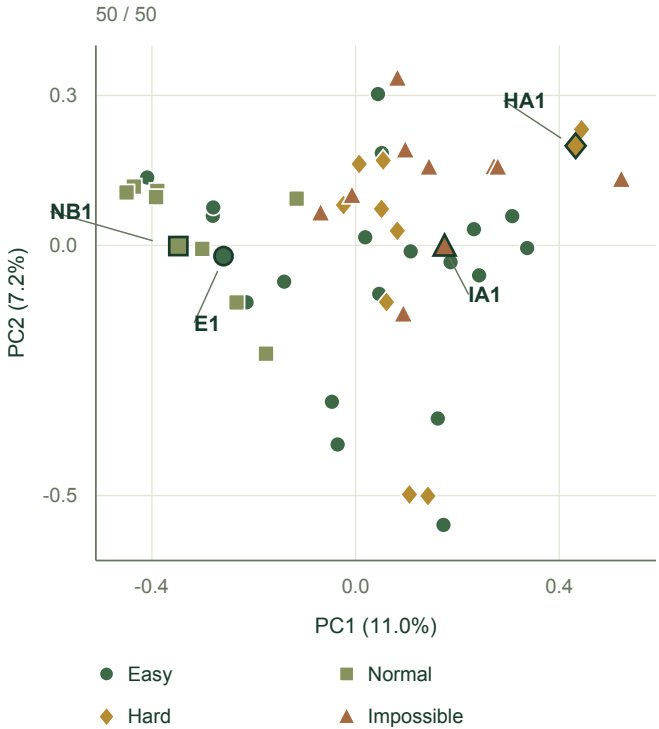

Competing stereochemical pathways

Impossible — 10 (20%)

Method and electronic-state boundaries

Tiers are predefined evaluation categories.

b Topic space of source task names

Topic proximity does not imply equal difficulty.
